ELSEVIER

European Journal of Operational Research 123 (2000) 660–662

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

www.elsevier.com/locate/dsw

Contents Volume 123

1 The dynamic relocation and phase-out of a hybrid, two-echelon plant/warehousing facility: A multiple objective approach
E. Melachrinoudis and H. Min

16 Fuzzy rule based classification with *FeatureSelector* and modified threshold accepting
V. Ravi and H.-J. Zimmermann

29 Lower-bounding procedures for the 2-dimensional cell suppression problem
F. Duarte de Carvalho and M.T. Almeida

42 Production lot sizing in failure prone two-stage serial systems
S.D. Lee and J.M. Rung

61 Computing performance measures in a multi-class multi-resource processor-shared loss system
O.Z. Akşin and P.T. Harker

73 Hybrid fiber co-axial CATV network design with variable capacity optical network units
R. Gupta and H. Pirkul

86 Algorithms for graph partitioning problems by means of eigenspace relaxations
C.-C. Tu, C.-K. Shieh and H. Cheng

105 Multi-factor performance measure model with an application to Fortune 500 companies
J. Zhu

125 The application of operational research to European air traffic flow management – understanding the context
P. Leal de Matos and R. Ormerod

145 Dynamic programming using the Fritz–John conditions
E. Steiner and K. McKinnon

154 Reciprocal distributions in the analytic hierarchy process
M.T. Escobar and J.M. Moreno-Jiménez

175 Optimal policies under risk for changing software systems based on customer satisfaction
I. Sahin and F. Zahedi

195 On a cutting plane heuristic for the stable roommates problem and its applications
C.-P. Teo and J. Sethuraman

206 An archiving model for a hierarchical information storage environment
K. Moinzadeh and E. Berk

227 Editorial: Recent advances in theory and practice of combinatorial optimization (ECCO X)
R. Burkard, M. Labbé, M.T. Ramos and J. Sicilia

229 Heuristics for the two-stage job shop scheduling problem with a bottleneck machine
I.G. Drobouchevitch and V.A. Strusevich

K. Moinzadeh and E. Berk

227 Editorial: Recent advances in theory and practice of combinatorial optimization (ECCO X)
R. Burkard, M. Labbé, M.T. Ramos and J. Sicilia

229 Heuristics for the two-stage job shop scheduling problem with a bottleneck machine
I.G. Drobouchevitch and V.A. Strusevich

241 Frequency assignment in mobile radio systems using branch-and-cut techniques
M. Fischetti, C. Lepschy, G. Minerva, G. Romanin-Jacur and E. Toto
256 Tabu Search applied to global optimization
R. Chelouah and P. Siarry
271 A multiperiod two-echelon multicommodity capacitated plant location problem
Y. Hinojosa, J. Puerto and F.R. Fernández
292 Algorithms for the robust 1-center problem on a tree
I. Averbakh and O. Berman
303 Scheduling no-wait robotic cells with two and three machines
A. Agnetis
315 A directed hypergraph model for random time dependent shortest paths
D. Pretolani
325 New trends in exact algorithms for the 0–1 knapsack problem
S. Martello, D. Pisinger and P. Toth
333 Approximation algorithms for knapsack problems with cardinality constraints
A. Caprara, H. Kellerer, U. Pferschy and D. Pisinger
346 The edge-weighted clique problem: Valid inequalities, facets and polyhedral computations
E. Magalhães Macambira and C. Carvalho de Souza
372 An efficient approach for the multi-pallet loading problem
J. Terno, G. Scheithauer, U. Sommerweiß and J. Riehme
382 A primal partitioning approach for single and non-simultaneous multicommodity flow problems
M. Hadjiat, J.-F. Maurras and Y. Vaxes
394 Unbounded knapsack problem: Dynamic programming revisited
R. Andonov, V. Poirriez and S. Rajopadhye
408 The asymmetric traveling salesman problem with replenishment arcs
N.L. Boland, L.W. Clarke and G.L. Nemhauser
428 Path equipartition in the Chebyshev norm
M. Liverani, A. Morgana, B. Simeone and G. Storchi

437 Use of location-allocation models in health service development planning in developing nations
S.-u. Rahman and D.K. Smith
453 Computational analysis of a flexible assembly system design problem
A. Kumar, S.H. Jacobson and E.C. Sewell
473 An exact method for the two-echelon, single-source, capacitated facility location problem
S. Tragantalerngsak, J. Holt and M. Rönnqvist
490 Coordinated replenishments in inventory systems with correlated demands
L. Liu and X.-M. Yuan
504 A branch and bound algorithm for a production scheduling problem in an assembly system under due date constraints
M.-W. Park and Y.-D. Kim
519 Replacement–repair policy for multi-state deteriorating products under warranty
M.J. Zuo, B. Liu and D.N.P. Murthy
531 Heuristic and exact algorithms for the simultaneous assignment problem
T. Yamada and Y. Nasu
543 A comparative analysis of DEA as a discrete alternative multiple criteria decision tool
J. Sarkis

558 Case-based decision support system: Architecture for simulating military command and control
S.-h. Liao
568 Coordinating an innovation in supply chain management
B. Kim
585 Partitioning under the L_p norm
R.R. Goldberg and J. Shapiro
593 Comparing the efficacy of ranking methods for multiple round-robin tournaments
D. Mendonça and M. Raghavachari
606 An extension of the PROMETHEE method for decision making in fuzzy environment: Ranking of alternative energy exploitation projects
M. Goumas and V. Lygerou
614 Subscript-free modeling languages: A tool for facilitating the formulation and use of models
S.-Y.E. Lin, D. Schuff and R.D. St. Louis
628 Separating risk and return in the CAPM: A general utility-based model
C.S. Pedersen
640 Clustering of objects and attributes for manufacturing and marketing applications
A.J. Vakharia and J. Mahajan
652 An efficient linearization approach for mixed-integer problems
C.-T. Chang
660 Contents of Volume 123
